

## 08: Structure of an Electronic Cigarette

### Atomized cartridge

The atomized cartridge is composed of an inhaler, a liquid container and an atomizer.

Please note that the atomized cartridge is intended for one time use only.

## 09: Installation instructions and operation

### Installation of components

Step one:           Unpack the cigarette cartridge and remove the inhaler cover from the cartridge.

Step two:           Insert the cartridge into the cigarette body.

Step three:         Screw the lithium ion battery into the AC Charger.

### Battery stand-by and charging

After installing a new cartridge and the lithium ion battery, your Elusion Electronic Cigarette will enter standby status.

Please allow the battery to charge for 6 hours before use.
